

CLAIMS

I claim:

- 1 1. A method of completing a well comprising, expanding a plurality of expandable sand
2 screens in a well and gravel packing a rat hole of the well.
1
- 1 2. A method of completing a well comprising, expanding a pair of spaced expandable sand
2 screens in a well, the expandable sand screens connected to one another by an
3 unexpanded tubing section, and gravel packing the portion of the well around the
4 unexpanded tubing section.
- 1 3. The method of claim 2, further comprising:
2 inserting an inner completion into the expandable sand screens and the unexpanded
3 tubing section; and
4 isolating the expandable sand screens by sealing between the inner completion and the
5 unexpanded tubing section.
- 1 4. The method of claim 3, further comprising controlling the flow from at least one of the
2 isolated sand screens with a valve of the inner completion.
- 1 5. The method of claim 3, further comprising monitoring the well with an intelligent
2 completion device of the inner completion.

6. A method of completing a well comprising, gravel packing around an expandable tubing section.
